

Terms and Conditions: Independent Evaluation Program

GENERAL DISCLAIMER Trading financial instruments, including forex, CFDs, and equities, involves substantial risk of loss and is not suitable for all investors. The use of leverage creates additional risk and loss exposure. **TradeLive24** does not provide financial advice, and all content provided is for educational and evaluation purposes only. Past performance is not indicative of future results. Participants engage in this evaluation at their own risk.

1. Corporate Structure & Legal Jurisdiction

TradeLive24 is wholly owned by **Tradelive Ventures**, a corporate entity registered in **Ras Al Khaimah (RAK)**. All operations, disputes, and contractual obligations are governed by and construed in accordance with the **laws of the United Arab Emirates (UAE)**. TradeLive24 serves as the official education and evaluation arm of Tradelive Ventures. This program is an **independent evaluation** and is not directly tied to any specific proprietary firm. Traders must strictly adhere to the rules set forth by TradeLive24, its partners, and its subsidiaries.

2. Evaluation Phases & Profit Objectives

The evaluation consists of a two-phase structure designed to identify disciplined, systematic traders:

- **Phase 1 Profit Target:** 10% of the initial account balance.
- **Phase 2 Profit Target:** 8% of the initial account balance.

3. Trading Consistency & Anti-Gambling Policy

The primary objective of this evaluation is to identify traders who demonstrate **long-term consistency and professional edge**.

- **Single Trade Windfall Restriction:** Profit targets cannot be met through a "single big trade". Success in this evaluation is predicated on a repeatable, systematic approach rather than isolated high-volatility events.
- **Consistency Mandate:** We are looking to fund traders who demonstrate a stable equity curve. Accounts that achieve profit targets through anomalous, non-replicable spikes or "all-in" gambling tactics will be flagged and disqualified upon manual review.

4. Risk Management Protocols

To maintain institutional-grade standards, the following risk parameters are hard-coded into our monitoring systems. Violation of any parameter results in immediate **account forfeiture**:

- **Max Daily Loss:** 5% of the starting balance of the day.
- **Max Overall Loss:** 10% of the initial account balance.
- **Max Risk Per Trade Idea:** 1.5% total exposure.

- *Note:* A "Trade Idea" encompasses all open positions on a specific instrument or correlated set. For example, opening two positions at 1% risk each (2% total) constitutes a violation of the 1.5% cap and will result in account disqualification.
- **Prohibited Practices:** The use of Expert Advisors (EAs), automated tools, bots, High-Frequency Trading (HFT) strategies, or gambling-style practices is strictly prohibited.

5. Consistency Requirements & Tenure

- **Minimum Profitable Days:** A minimum of **5 trading days** is required to pass each phase.
- **Profitable Day Definition:** A day is only classified as "profitable" if a minimum profit of **0.5%** of the starting balance (\$500 on a \$100k account) is generated.
- **Maximum Tenure:** Participants have a maximum of **180 days** from the first trading day to complete both Phase 1 and Phase 2.
- **Limited Allocation:** Only **10 funding spots** are available for this round. If 10 traders qualify before the 180-day limit expires, the contest will officially conclude.

6. Risk Monitoring & Final Verification

All accounts are integrated with the **Tradelive Ventures Risk Analytics Tool**. This software monitors real-time data for unusual volatility spikes, revenge trading, or strategic non-compliance.

Upon successful completion of both evaluation phases:

1. **Compliance Audit:** A manual audit of the trading history to ensure all risk and consistency parameters were respected.
2. **Professional Interview:** The trader will be required to join a mandatory session for manual verification of their methodology and professional competence.
3. **Capital Allocation:** Upon a positive verification, the trader will be funded with a **\$100,000 account** through partners including, but not limited to, **FTMO, Funding Pips, Alpha Capital Group**, or equivalent tier-1 proprietary firms.
